SOUTH LAURENS STREET TO BE CLOSED BEGINNING MARCH 30

(Greenville SC) Beginning Monday, March 30, South Laurens Street, from West Washington Street to West McBee Avenue, will be closed for construction of pedestrian crosswalks. The closure is expected to last through the month of April.

South Laurens Street is an important link from Washington to McBee, both for pedestrians traversing downtown and for motorists who park at downtown facilities and walk to surrounding restaurants and businesses. Installation of the crosswalks is an important safety measure and a component of the streetscape improvements that have been made in the area, including landscaping, lighting and street furniture.

For more information about this project, contact Warren Rowe, Project Manager, at 467-4358.

Information on roadway projects taking place in the city of Greenville can also be found on the front page of the City's web site under "Traffic Alerts" at www.greenvillesc.gov.
