DIVISION 3. NOISE

Sec. 16-91. Definitions.

The following words, terms and phrases, when used in this division, shall have the meanings ascribed to them in this section, except where the context clearly indicates a different meaning. Except as otherwise provided, all words in this division shall be given their ordinary and customary meaning.

Ambient noise means the generally prevailing sound or combination of sounds at the location where a listener receives the sound of the noise about which a complaint is being made. It is the sound or combination of sounds which a person of ordinary sensibilities would reasonably expect to encounter at the location in the ordinary and customary use of the premises.

Central business district (CBD) means the downtown area, more particularly identified as zoning district C-4, as the boundaries may from time to time be amended or adjusted under the city's zoning ordinances.

Day and daytime mean the period between 7:00 a.m. and 11:00 p.m. of the same calendar day.

Night and nighttime mean the period between the hours of 11:00 p.m. one calendar day and 7:00 a.m. the following calendar day.

Cross reference(s)--Definitions generally, § 1-2.

Sec. 16-92. Prohibited noise generally.

Any noise of such character, intensity or duration which substantially interferes with the comfortable enjoyment of persons of ordinary sensibilities occupying, owning or controlling nearby properties, or persons making use of public properties for their intended purposes, is hereby declared to be unlawful and to be a nuisance, and is prohibited.

(Code 1985, § 7-2-12; Ord. No. 96-26, § 2(7-2-12(a)), 4-22-96)

Sec. 16-93. Standard of reasonableness and use of technology.

It is the intent of the city council in regulating noise to take into account the latest scientific advances in noise measurement and control while at the same time preserving the common sense and common law determination of what constitutes a disturbance or public nuisance. Therefore, technological sound level measurements, while desirable, shall not be required to demonstrate a violation of this division or any other ordinance or statute which establishes the creation of

disturbance or public nuisance. Decibel level measurements less than those specified in this division may still establish a violation of this division when due regard is made for the time, place and circumstances of the noise.

(Code 1985, § 7-2-12; Ord. No. 96-26, § 2(7-2-12(b)), 4-22-96)

Any person who fails or refuses to obey such order shall be guilty of a violation of this section.
